

Energy

Know Your Energy Sources

Energy is a big part of our lives, it makes things work. Cookers, lights, mobile phones, cars and even the sewing machines that made your clothes; all these things are powered by energy. But where does our energy come from? The pictures below will give you some clues.

For many years, we have been using non-renewable sources of energy, but now we know that this is doing a lot of damage to God's wonderful world. More and more, we are trying to find cleaner and more renewable ways of powering our lives.

		
		
		
Nuclear Energy	Wind Energy	Geothermal Energy
Coal	Hydropower	Natural Gas
Solar Energy	Biomass Energy	Fossil Fuel Oil
